Teaching Effectiveness

NB: for want of better evidence, the following are passages from recent student letters, the first three prompted by the sudden news that I was leaving Tor Vergata.

“...Per quel che vale, ritengo che lei sia stato di gran lunga il miglior insegnante che abbia avuto la ventura di incontrare. Ho imparato di più con lei che con qualsiasi altro professore...” [For what it’s worth I think you were by far the best teacher I ever met. I learned more from you than from any other professor] (A. M., October 30, 2013)

“...Il suo corso di European Economic History è stato davvero la cosa più bella che abbia avuto da questa Facoltà...” [Your course in European Economic History is truly the best thing I have received from Tor Vergata] (G. G., October 30, 2013)

“...Volevo ringraziarla per aver fatto sorgere in me la passione per la ricerca scientifica...” [I wanted to thank you for inspiring my commitment to research] (G.P., October 30, 2013)

“...I took a class with you on European Economic History at Williams College in the Spring of 1984... this class was probably the most influential and best of my college career. It profoundly shaped my intellectual development and interests as well as improving my discipline as a writer. I thought I would take advantage of the internet and drop you a note to let you know the effect you have had as a teacher on at least one person.” (K.B., January 31, 2014)

“... Lei è sicuramente la persona che più ha influenzato positivamente il mio percorso. E' stato l'unico professore che mi ha consentito di sviluppare un pensiero critico... i suoi insegnamenti sono stati non solo economici ma veri e propri insegnamenti di vita...” [You are indubitably the person with the greatest positive influence on my studies. You were the only one who allowed me to develop the ability to think for myself... you taught us not just economics, but how to live...] (P.S., July 5, 2016)

ADMINISTRATION

I have never held a major administrative position (Department Chair, Dean...). The usual low-level committees aside, my major administrative contribution was to shape and push through the reform of the undergraduate curriculum, and thence to chair the major committees that oversaw its implementation, while at the Università di Brescia.
